

FORIA™ INTIMACY

Organic CBD Lubricant

Enhance pleasure and wetness naturally. Foria's organic-certified, 100% lickable lube makes foreplay and sex extra fun, with the silky texture of liquid coconut oil, combined with the activating power of broad-spectrum CBD. CBD helps relax the internal muscles of the pelvis, increasing blood-flow & pleasurable sensation, while easing discomfort & dryness. Our CBD comes from sun-grown USA hemp and is carefully extracted to retain its beneficial cannabinoids and terpenes. The final formula is independently lab-tested for purity, ensuring that it's free of everything you don't want to get between you and your pleasure.

- Organic & 100% plant-based ingredients
- 100% organic MCT oil from sustainably-grown coconuts
- Premium broad-spectrum CBD from sun-grown USA hemp
- CO2 extracted & lab-tested for purity
- Free of pesticides, heavy metals, microbes or THC
- No artificial ingredients or fragrances
- No parabens, glycerin, petroleum, or silicone

Typical Results

- Enhanced sensation & arousal
- Increased glide & natural wetness
- Reduced discomfort & tension
- Deeper / easier orgasm

Features

- Silky natural glide
- 100% lickable
- Organic, vegan, gluten-free

Usage

Foria's CBD lubricant is designed for topical use at the start of foreplay. Apply directly on the labia, clitoris, and inside the vagina. Sensation-enhancement begins to build after massaging it in, though some people may desire some time to absorb — even before foreplay begins. Experiment to find your ideal style. The smooth glide enhances manual stimulation & penetration. Re-apply as desired throughout the session for extra glide or stimulation.

Cautions

- Oil-based: not for use with latex.
- Allergens: avoid use if you (or your partner) are allergic to any ingredients. Contains coconut oil, which is considered a "tree nut."

Ingredients

Organic MCT Coconut Oil, Broad-spectrum Hemp Extract
