

## Instructions for Use

### TO REASSEMBLE CUFFS AS PACKAGED:

- Make sure the crimp in the rope loop is at the center.

- Make a smaller loop at each end and pull it through one side of the metal swivel.

- Repeat with a second loop through the other side of the metal swivel.

- Bring each pair of loops together to form cuffs.

- Slide the metal swivels toward or away from the center to loosen or tighten the cuffs.

### ADDITIONAL USES:

- Your rope cuffs can be used in a variety of ways. For less slack in the rope between the wrists/ankles, tie one to three knots at the center of the rope before assembling your cuffs.

- For more slack in the rope between the wrists/ankles, pull a single small loop through both sides of the metal swivels.

- Combine single and double loops according to your needs.

- Turn your cuffs into restraints by securing a double loop to the wrist/ankle and a single loop to furniture, hooks, etc.

- Remove both metal swivels before hand washing rope
